MODEL / MODELO: PAF1690

FREIDORA DE AIRE DE 16L

Instruction Manual / Manual de instrucciones

Read this instruction manual carefully before use and keep for future reference.

Lea este manual de instrucciones detenidamente antes de usarlo y conservelo para futuras consultas.

When using this electrical appliance, the following basic safety precautions should always be followed:

For Your Safety

- **Voltage.** Make sure your outlet voltage and circuit frequency correspond to the voltage stated on the appliance rating label. If it does not, do not plug in the appliance. Ignore and do not use the appliance.
- **Connection.** Insert the plug properly into a grounded outlet. Do not use an adapter. Do not use a within easy reach so that it can be easily removed if necessary.
- **Electrical shock.** To avoid an electrical shock overload do not use a high wattage appliance on the same circuit as that the Air Fryer.
- **Do not immerse.** To protect against electric shock, do not immerse cord, plug, or any part of the appliance in water or other liquid. Make sure base is accidentally immersed, immediately unplug from outlet. Wait for it to cool down and have it inspected by a qualified service personnel.
- **Protect from moisture.** Do not expose the electrical connections to water. Do not use the appliance outdoors. Do not use near a gas or damp burner, on a stamp, or any area where the electric base is wet.
- **Power cord.** A short power supply cord is provided to reduce the hazards resulting from becoming entangled in or tripping over a longer cord. However, if an extension cord must be used, make sure its marked electrical rating is at least as high as that of the Air Fryer. Extension cord is set out drapes over the countertop or table where it can be pulled on or tripped over accidentally. Do not sink, bore, cut, damage, or repair the power cord. Do not subject it from sharp edges and heat. Do not let the cord hang over the edge of a table or countertop or it comes hot surface.
- **Damage.** Check the power cord regularly for damage. If the power cord is damaged, it must be replaced by the manufacturer, its premises in order to avoid any hazards. Do not pick up or carry the appliance by the power cord, plug, or other face, or attempt to operate it if has been dropped or damaged in any manner.

In case of damage, call our after-sales support line the above or repair or return of the damaged product.

- **Unattended.** Do not leave the appliance unattended when plugged in.
- **After use.** Unplug the appliance after use. Wait until it has cooled completely before putting on or taking off parts.
- **Disconnect.** Always unplug the power cord from the appliance is not in use. When unplugging the appliance, grip by the plug, do not pull by the cord.
- **RCD.** Unless your home is already fitted with a residual current device (safety switch), we recommend installing an RCD with a rated operating current not exceeding 30mA. Seek from a qualified electrical safety protection when using electrical appliances. See your local electrical dealer for advice.

Caution: Hot Surfaces!

- The Air Fryer and accessories will become hot during use. To avoid burns, do not touch hot surfaces until it has had time to cool down. The Air Fryer Only touch the handles and control panel. Use oven gloves or pot holders when handling hot accessories after use. The appliance exceeds approximately 30 minutes of use. Do not let the Air Fryer or its cooled down fully before it is stored. Do not store any of the appliance by a person responsible for their safety.
- **Children.** Supervise children to ensure they do not play with the Air Fryer.
- **Location.** To ensure efficient operation and avoid overheating, always place the appliance on a stable, level, heat-resistant surface.
- **Protect from heat.** Do not place the appliance on or near a hot gas or electric burner, or near a heated oven.
- Do not pour any liquids (e.g oil or water) directly into the Air Fryer. Only use ingredients that have been prepared according to this book in the Air Fryer. It works exclusively with hot air.
- **CAUTION:** Never use the appliance with a damaged surface to food items, e.g. by the appliance. Always ensure that the Air Fryer is cool before cleaning.

Be careful not to touch hot surfaces. Use the handles and control panel.

Be careful not to touch hot oil or steam when removing the basket or when pouring out hot oil.

Be careful when handling the fork in order to avoid injuries.

The fork will be hot and oven gloves must be used when handling.

- Slide one of the rotating forks onto the shaft and lock it with the locking screw. The shaft contains a small round notch for the tip of the locking screw. Turn the locking screw until it is fixed. The rotating forks can be removed from centrally on the shaft.
- Slide the items you want to grill onto the rotating forks.
- Slide the other rotating fork onto the shaft and lock it with the locking screw.
- Plug the left-hand end of the shaft with just one notch (see illustration 8) as far as it will

Usage Conditions and Restrictions

- **Indoor domestic use only:** This appliance is intended for indoor domestic use only. Do not use it outdoors.
- **Intended purpose:** This Air Fryer works with circulating hot air and a conventional fryer that is filled with oil or deep-frying fat. It is suitable for frying, baking, grilling, and roasting.
